No modern antidefect browser, including MLA, has the ability to import the full data package needed to guarantee account usage.
dont.farm uses Chromium together with RDP, which meets the highest social network **anti-fraud standards**.

We take care of all appeals

Account blocking is often unfair and has more to do with Facebook's own mistakes than with your advertising. The process of sending an appeal is already an **integral part of the launch**.

Save yourself some time and leave the unblocking to us. Thanks to the service's customized processes, we have consistently rescued **60% of accounts** and will continue to advocate for their right to resume advertising activity.

dont.farm is one of the best companies to generate unlimited facebook

They even gave me the best practices for ad account longevity which worked like a charm. I have so many accounts that are still running ads for months now without any issues.

accounts all around the world. Also if your ads get banned and require email, phone number or ID the team helps you. They are the reason I am still in marketing.

Before coming across Dont.farm, we have been struggling with ad accounts all the time now things are really smooth. We get an account banned and always get a replacement right away. Ad accounts are the main issue

We were in a bad position as we wanted to advertise on Facebook but they just did not care. Dont.farm were a life saver their white hat accounts allow us to run ads for our white hat projects. We have used their accounts for months and months and they have spent high. 10/10
